Summary

iOS Engineer with **4+ years of experience** building and scaling **production-grade iOS applications** across **AI, Healthcare, FinTech, marketplaces, media streaming, and real-time systems**. Built, maintained, and scaled **15+ production iOS applications** published on the **App Store** using **Swift, SwiftUI, UIKit, Combine**, and modern architectures including **MVVM-C, Clean Architecture, and VIPER**. Delivered production applications serving **60K+ users** while **integrating AI models** and leveraging **AI-assisted development workflows** to accelerate feature delivery, improve code quality, and enhance engineering productivity. Strong expertise in **real-time communication, VoIP/video streaming, GPS tracking, payment gateway integrations, performance optimization, and App Store release management**. Passionate about building **scalable, maintainable, and high-performance iOS applications** that deliver exceptional user experiences and business value.

Work Experience

Awamer Alshabaka (AAIT) — Mid-level iOS Engineer

01/2026 – Present
Hybrid | Mansoura, Egypt

- Built, maintained, and scaled **15+ production-grade iOS applications serving 60K+ users across** healthcare, FinTech, marketplaces, and media streaming domains.
- Leveraged **AI-assisted** development tools, including Claude Code, GitHub Copilot, Cursor, and Gemini, to accelerate feature delivery, improve code quality, and enhance engineering productivity.
- Led the implementation of new features across live applications while collaborating with **cross-functional teams** to deliver evolving client requirements.
- Diagnosed, debugged, and resolved critical production issues, improving **application stability, performance, and App Store compliance**.
- Participated in **architecture discussions, code reviews**, and technical decision-making to improve development standards.
- Mentored **junior iOS developers** through code reviews, technical guidance, and knowledge sharing.
- Collaborated closely with **backend, QA, UI/UX**, and **product teams** throughout the full software development lifecycle.
- Managed **App Store releases, TestFlight distributions**, and production deployments, ensuring smooth and high-quality releases.

Awamer Alshabaka (AAIT) — iOS Engineer

04/2023 – 01/2026
On-site | Mansoura, Egypt

- Built and shipped production iOS applications using **Swift, SwiftUI, UIKit, Combine, MVVM-C, and Coordinator**.
- Developed real-time features including **live chat, GPS tracking, live auctions, push notifications, and live updates** using **Socket.IO** and **Firestore**.
- Integrated multiple payment gateways including **MyFatoorah, HyperPay, Apple Pay, PayTabs, Moyasar, and Telr**.
- Refactored legacy modules into **MVVM-C** and **Clean Architecture**, improving maintainability and accelerating future feature development.
- Optimized application performance, memory usage, and launch time to ensure smooth App Store releases.
- Designed reusable UI components and scalable modules to improve consistency across multiple applications.

NationTech — iOS Engineer

12/2022 – 03/2023
On-site | Sheikh Zayed,
Giza, Egypt

- Contributed to the development of **AWSS**, a large-scale e-commerce platform for food, groceries, and electronics.
- Built reactive application flows using **RxSwift, RxCocoa**, and **MVVM** architecture.
- Collaborated with cross-functional teams to deliver scalable, maintainable, and production-ready features.

Algorezmi — iOS Engineer

01/2022 – 11/2022
Remote | London, UK

- Developed **Global-M**, a live media streaming platform for news and sports.
- Built the entire user interface programmatically using **UIKit** and **VIPER** architecture without Storyboards.
- Implemented low-latency live streaming using the **SRT protocol** and **AVFoundation**.
- Collaborated remotely with distributed teams to deliver high-quality production features.

Projects

Home Maintenance

- Home maintenance marketplace featuring instant and scheduled bookings, technician selection, real-time order management, and price negotiation.
- **Tech Stack:** SwiftUI, MVVM-C, Observation Framework, Combine, Socket.IO, HyperPay
- [App Store \(User\)](#) | [App Store \(Technician\)](#)

OSR

- Multi-service marketplace connecting customers with productive families and service providers, featuring ordering, secure payments, live tracking, and provider ratings.
- **Tech Stack:** SwiftUI, MVVM-C, Observation Framework, Combine, Socket.IO, REST APIs, Moyasar
- [App Store \(User\)](#) | [App Store \(Delegate\)](#) | [App Store \(Store\)](#)

Muakad

- Healthcare platform supporting instant and scheduled consultations with real-time chat, video calls, appointment management, and secure payments.
- **Tech Stack:** UIKit, MVVM-C, Combine, Socket.IO, OpenTalk SDK, MyFatoorah
- [App Store \(User\)](#) | [App Store \(Provider\)](#)

Souq Al Houta

- Multi-category delivery platform serving 60K+ users with shopping, secure checkout, and real-time order tracking.
- **Tech Stack:** UIKit, MVVM, REST APIs
- [App Store \(User | Delegate | Store\)](#)

LaserHome

- Beauty and skincare consultation platform featuring specialist discovery, consultation booking, wallet, and customer support.
- **Tech Stack:** UIKit, MVVM-C, Combine, REST APIs, MyFatoorah
- [App Store \(User\)](#) | [App Store \(Specialist\)](#)

Mehanti Bedi

- Home services marketplace connecting customers with skilled technicians through booking, secure payments, wallet, and analytics workflows.
- **Tech Stack:** UIKit, MVC, REST APIs, Apple Pay, AppsFlyer, PayTabs
- [App Store \(User | Technicians\)](#)

GlobalM

- Live media streaming platform delivering news and sports content with low-latency SRT streaming using AVFoundation.
- **Tech Stack:** Programmatic UIKit, VIPER, AVFoundation
- [App Store](#)

Skills

Languages

Swift, Objective-C

AI-Assisted Development

GitHub Copilot, Claude Code, Cursor, Codex, Gemini, MCP

Concurrency

Swift Concurrency (async/await), Combine, GCD, OperationQueue

Persistence

Core Data, Realm, Firebase (Firestore, Realtime Database), UserDefaults

Payments

Apple Pay, MyFatoorah, HyperPay, PayTabs, Moyasar, Telr

UI Frameworks

SwiftUI, UIKit

Architecture

MVVM-C, Clean Architecture, VIPER, Coordinator, Dependency Injection, Modular Architecture, MVC

Networking & Real-Time

URLSession, REST APIs, Alamofire, Moya, Socket.IO

SDKs & Frameworks

AVFoundation, CoreLocation, MapKit, Google Maps SDK, Firebase SDK, OpenTalk SDK

Tools

Xcode, Git, GitHub, GitLab, Jira, Postman, Figma, App Store Connect, TestFlight, Fastlane, GitHub Actions, Swift Package Manager (SPM), CocoaPods

Education

Diploma in Computer Science, [Cairo University – FGSSR](#)

10/2019 – 06/2021

Bachelor's in Information Systems Management, [H.I.T.C.H](#)

10/2013 – 05/2017

Languages

• Arabic: Native

• English: Professional Working Proficiency

Awards & Recognition

[Employee of the Month](#) — August & September 2023, Awamer Alshabaka (AAIT)
